DESCRIPTION

Product is polyurethane based and has a density of 26 Kg/m³. Due to its' open cell structure it has good sound absorption values in high frequencies.

Flame behavior of the product is class SE according to MVSS 302 standard. It is providing economical solution in Automotive, white good industry and other noisy machines when used in different shapes and forms.

It can be cutted to viol and pyramidal shapes. Fabrics and special pu films can be applied on the surface of foam and self adhesive tape can be applied on the foam.
